Global bases

Passion in Creating Tomorrow

Sustainability

Initiatives for Sustainability (SDGs)

The Pacific Industrial Group has established four pillars related to its long-term vision, 15 material issues, and SDG goals on which to focus. Together, we aim to create a sustainable society.

The Four Pillars

1. Fostering trust with stakeholders
2. Solving social and customer issues through products
3. Minimizing environmental load
4. Respecting human resources and their active participation

Sustainability

Our website posts various information such as corporate information, IR, and sustainability initiatives.

PACIFIC INDUSTRIAL CO., LTD.

PURPOSE

The Pacific Industrial Group's purpose, "Passion in creating tomorrow," is for our diverse employees to have a "Passion," demonstrate their individual strengths, and create new value.

In order for our company to continue to be a presence needed by society, we will work together with our colleagues from The Pacific Industrial Group around the world.

With passion, we will create a sustainable tomorrow.

Message

In 1930, our company was founded in Japan with the challenge of domestically producing valve cores for automobiles.

In addition to strengthening the foundations and investing in the development of our current mainstay stamping/plastic molding and valve businesses, we are also looking to expand our business areas over the long term. Also we are boldly taking on the challenge of developing new businesses that solve social and customer issues, with a long-term perspective of business domain expansion.

In order to continue to be an entity that is valued by society, the Pacific Industrial Group aims to be a company that contributes to the realization of a sustainable society by fostering trust with all stakeholders and promoting the creation of new value together with our colleagues around the world.

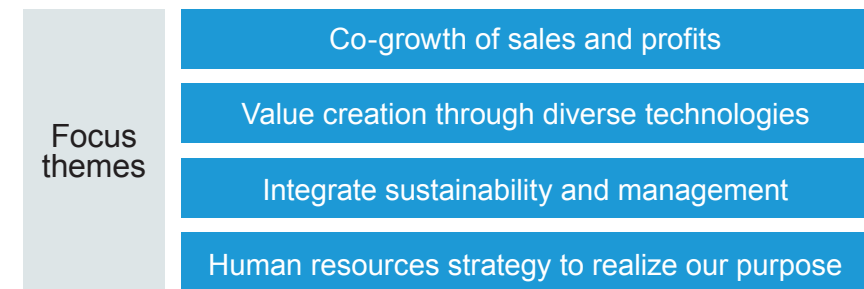

Tetsumi Ogawa

President, Member of the Board

Mid to Long-term Business Plans

In the severe environment of VUCA, where the future is unpredictable, we have formulated a mid to long-term business plan, "Beyond the OCEAN." The mid-term business plan, as a mid-term milestone, covers the four-year period until fiscal 2026. We named it "NEXUS-26" with the idea of "connecting values", "connecting with bonds" and "group management".

With "Beyond the OCEAN" and "NEXUS-26", we will continue to create new value.

Mid to Long-term Business Plans

Main Products

Plastic Molding Products

We manufacture a wide variety of plastic molding products with our strengths in decoration technology, sound proofing, and vibration damping technology. The Group uses its strength of being able to act consistently from planning to production, to promote one-of-a-kind manufacturing.

Stamping Products

We manufacture various stamping products including body parts to secure the strength and rigidity of the body.

We focus on forming technology for ultra-high tensile materials that achieve both weight reduction and high rigidity.

Valves & TPMS Products

We produce valve products that have allowed us to take the world's top market share, TPMS products that protect safe driving and contribute to improved fuel efficiency, and electric expansion valves for BEVs, etc.

IoT

The combination of products, IoT and AI technologies provides valuable data consistently, not only through products but also through the web and apps, and contributes to the promotion of DX and the resolution of issues for customers.
